Subject: Urgent Call to Form an Initiative Against WHO Agreements and Their Implementation

Dear Ms. García Pérez,

We urgently call on you as the Chair of the Progressive Alliance of Socialists and Democrats to initiate a movement to oppose the WHO's International Health Regulations (IHR-2024) and the Pandemic Treaty 2025, and to prevent their implementation in EU law. These agreements pose severe risks to fundamental rights, national autonomy, and democratic principles, opposing your commitment to protecting the vulnerable.

The IHR-2005 grant the WHO Director-General unchecked powers to declare a Public Health Emergency of International Concern (PHEIC) without oversight, enabling arbitrary restrictions. The IHR-2024 exacerbate this with a vaguely defined "pandemic emergency," promoting "relevant health products" (including modRNA vaccines linked to gain-of-function research, constituting medical experimentation), and enforcing "infodemic" policies that suppress free speech and science. The Pandemic Treaty 2025 intensifies these threats through the Pathogen Access and Benefit-Sharing (PABS) system and a "Conference of the Parties" that undermines member state sovereignty.

Moreover, the promotion of gain-of-function research endangers human life and health, contravening the right to bodily integrity (Art. 3, EU Charter). This research, which deliberately enhances pathogens, constitutes medical experimentation without consent, violating the Nuremberg Code of 1947—forged from the horrors of Nazi medical crimes in Germany. Your leadership carries a responsibility to oppose these agreements to prevent coercive practices reminiscent of historical atrocities.

We oppose the unauthorized processing of personal and sensitive medical data, including biometric data, without informed consent, violating GDPR principles (Art. 5, 6, 9, 13, 14, 16, 17, 32, 35, 44–50), including lack of purpose limitation, inadequate security measures, unlawful international data transfers, and failure to conduct a data protection impact assessment. A wide majority of EU citizens are unaware of these initiatives, breaching transparency obligations (Art. 15 TFEU). These agreements also violate democratic principles (Art. 10 TEU) by ignoring citizens' rejections and undermine the right to effective legal remedy (Art. 47, EU Charter).

In line with your commitment to protecting the vulnerable, we demand:

- Formation of an initiative to oppose the WHO's IHR-2024 and Pandemic Treaty 2025 and prevent their implementation in EU law.
- An end to unauthorized data processing and gain-of-function research.
- Full transparency on WHO agreements and decision-making processes.

We kindly request confirmation of receipt of this letter and a substantive response to our concerns within two weeks of its delivery. Your prompt attention to this matter is essential to uphold transparency and democratic accountability.

We trust in your leadership to protect the vulnerable and fulfill your obligations to European citizens.

Sincerely,

Your Signature
Concerned EU Citizen
